im Rahmen von GROW*

GEFÖRDERT VOM

Hintergrund

- SDGs verabschiedet von UN 2015
- Implementierungsprozess – Indikatoren für Reporting weitgehend festgelegt – HLPF zu aktuellen Stand ausgewählter SDGs – 2018 zu Wasser
- Weitgehend fehlende internationale Koordination der wissenschaftlichen Gemeinschaft im Wasserbereich (keine Plattform analog IPCC - fokussierte wissenschaftliche Stimme)
- Schwache Koordination bezüglich Wasser auf UN-Ebene (UN-Water als eher schwacher Koordinationsmechanismus)

- Some of indicators for measuring SDG 6 do not sufficiently represent the outlined goals, are not conceptually clear, not measurable or lack adequate data.
- Data availability for the evaluation of the status quo poor in some countries.
- Competing or even conflicting targets of different SDGs are not well understood
- Inadequate governance structures for SDG implementation
- Without participation by relevant stakeholders development of solutions that are not implemented on the ground and/or are unsustainable.
- Lack of awareness among industrialized countries that implementation of SDG 6 also poses a challenge for them.
- The sustainable financing of investments in the water sector requires huge amounts of additional resources.
- Groundwater as an important water resource for water supply is currently not adequately represented in SDG 6.
